

'Paediatric Nutrition Education Day'

General Practitioners play a key role in monitoring children's growth and development and supporting families. With so many areas to address, keeping up to date and ensuring practice is evidence-based can be challenging. This symposium provides a unique opportunity to update knowledge on a range of nutrition-related topics in a one-day program.

Topics to be included:

- Infant formula update
- Common nutritional issues in infancy
(Includes: weaning, GI issues, specialist diets, growth)
- Food allergy
- Common nutritional issues in childhood
(Includes: behavioral eating issues, GI issues, specialist diets, growth)
- Weight Management
- Atypical Anorexia

Who should attend?

General Practitioners with an interest in paediatric nutrition, looking to develop their knowledge in this area.

When & Where:

Wednesday 9th February 2022.

Due to covid-19 restrictions this event will run online

Cost:

Early Bird registration \$280 (including GST) - Closes Monday 17th January 2022
